BERNI PRINS

Berni Prins is a certified farrier, who has obtained his diploma in 2002 at the NHB (Nederlandse Hippische Beroepsopleidingen) in Deurne.

In 2015, Berni Prins joined the board of the Dutch Association of Farriers. In addition to his role as vice-chairman, he is involved in education. In this role, he works with other parties involved in the content and examination requirements of the European certified farrier training and he is the contact person for schools, internship providers and the examination board.

Berni Prins currently works as an itinerant farrier, visiting customers at their stalls. His work mainly consists of supervising (large) sports stables. His work is diverse: trimming, regular and sport shoeing, excision of hoof ulcers, position corrections in foals, (light) orthopedic hoof care.

Berni Prins has his own forge in Bears next to the Horse Clinic of Arts&Dier. Here he works as an orthopedic farrier Mondays, Wednesdays and Friday afternoons. At this location horses can be sampled on a hard and soft surface, so that a good analysis of their movements can be made. Here he mainly focuses on lameness, uneven feet, laminitis, jet cancer and other hoof diseases, tendon problems, horny columns and more.
